Senior Network Engineer

As a long term strategic supplier for federal government, we have many opportunities available for interesting and diverse work, on major client projects in areas relating to engineering, research and technology. We have an excellent reputation for delivering innovative and reliable IT solutions to various government departments and diverse areas including revenue collection, health, police, utilities and defence to name a few. More importantly we challenge our employees and support learning and development locally and globally. We aim to provide flexible, agile work environments and support your need for a healthy work/life balance. We want you to be a part of our digital transformation journey!

Senior Network Engineer (Multiple roles)

Location: Sydney

Are you a Senior Network Engineer who enjoys a team environment? Do you want to be proud to work for a company that respects its people and is at the forefront of technology? Are you experienced in the design, build, deployment and support of complex network solutions?

Fujitsu is expanding a professional technical team skilled across network solutions supporting a large Federal Government client within the Maritime Environment in Sydney.

Apply Now permanent role with following core skills!

Core Skills

- 3+ years as a network engineer performing design and/or 3rd level incident resolution in an enterprise scale or ISP environment;
- Proven experience with advanced routing using BGP and OSPF protocols;
- Proven experience producing a range of documentation - from simple work instructions to detailed designs;
- Proven ability to multitask to produce outcomes in a complex, fast paced and dynamic environment;
- Expertise with the following vendor technology - ideally certified to professional level;
- Cisco ISR and ASR Routers and Catalyst switches,
- Cisco Security appliances,
- Cisco Call Manager, CME and VoIP,
- Bluecoat/Symantec Proxys and gateways,
- Sound understanding of ITIL best practice and ISO Quality Standards. Ideally ITIL v3 Foundation certified.

Expertise in at least one of the following:

- Cisco Wireless
- Public Key Infrastructure and encryption technologies
- Automation tools such as Python/Ansible and working with APIs
- Network management tools such as Nagios/Icinga, Graylog and Splunk
- Satellite and Cellular WAN technologies

Skills (preferred)

- Hyper-V and /or VMware virtualisation technologies;
- Citrix Virtual Desktop Infrastructure;
- Understanding of constraints working within a government, military or marine environment.

Flexibility, Diversity and Inclusion

Fujitsu is committed to equality of opportunity for all. Achieve more and thrive with a global brand that actively nurtures and supports our diverse employee and client networks. We value unique perspectives on our team, therefore we welcome and encourage applications from people with a diverse variety of experiences, backgrounds, sexualities and gender identities. We have a culture of respect for professional and private commitments although some roles may demand some travel and flexibility to meet clients and to drive performance.

Some of the benefits of working for Fujitsu include: recognition programs for staff, flexible work arrangements, purchased leave, novated lease options and discounts for travel with Mantra Group, Accor, Qantas, Avis and British Airways. You will also be eligible for technology discounts with Apple, Canon, Optus and Microsoft. We also provide physical wellness rebates with BUPA, Fitness First, SpecSavers and Navy Health and are strongly committed to Sustainability.
